APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the

following limitations and conditions:

This permit to change the place of use of a portion of the waters of an underground source as heretofore granted under Permit 42548 is issued subject to the terms and conditions imposed in said Permit 42548 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued under the provisions of NRS 534.120(2) as a preferred use.

## (PERMIT TERMS CONTINUED)

This permit is issued in accordance with and subject to the conditions stated under State Engineer's Ruling No. 2719 dated September 29, 1981. The manner of use under this permit is limited to only fire protection purposes within the described place of use. The total combined rate of diversion under Permits 42548, 42793 and 52288 shall not exceed 1.0 cubic feet per second.

The total combined duty of water under Permits 42548, 42549, 42793 and 42794 shall not exceed 7.29 million gallons annually.

The total combined duty of water under Permits 42548, 42549, 42793, 42794, 52288 and 52289 shall not exceed 32.85 million gallons annually.

Totalizing meters will be installed on each existing well covered under Permits 42793 and 42794, and these meters will be fully functional and operational at all times that water is being diverted from the permitted wells.

An adequate valve and meter system must be designed to ensure that the amount of water granted under Permits 42548, 42549, 52288 and 52289 is used only for quasi-municipal purposes to serve the Douglas County School District, and that the water diverted under Permits 42793 and 42794 is use only to provide fire protection on an emergency basis for the Indian Hills General Improvement District.

Approval by the State Engineer will be required before any physical connection is made between the Douglas County School District water system and the Indian Hills General Improvement District water system, or any other water distribution system, which is above and beyond that required to accomplish the beneficial use represented under Permits 42793 and 42794.
